

## Building a Hybrid RB26 Z

### Part 29(b) Fabricating the Pipework – The Oil Cooler

The oil cooler purchased from Just Jap (\$75) in NSW was fitted

The 19 row cooler

The oil cooler mounted vertically in front of the condenser

The cooler adjacent to the condenser

The hoses for the oil cooler will run across to the drivers side and back to the oil filter sandwich plate.

Additionally the Oil Accumulator will have to be tied into the oil circuit
